PROFESSIONAL SUMMARY

Full Stack Developer specializing in backend development using Node.js and Express.js with strong expertise in REST API design, authentication systems, and database architecture. Experienced in building scalable applications using React.js, Next.js, MongoDB, and Python. Strong debugging, problem-solving, and system design fundamentals with proven performance optimization results.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Python, REST APIs, MVC Architecture, Middleware, Centralized Error Handling

Database: MongoDB (Schema Design, Referencing Pattern, Indexing, Aggregation), MySQL

Authentication & Security: JWT (Access & Refresh Tokens), bcrypt, httpOnly Cookies, Role-Based Access Control, Protected Routes

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Performance: Code Splitting, Memoization, Lazy Loading, Query Optimization

Tools: Git, GitHub, Postman, Chrome DevTools, Lighthouse

PROJECTS

LangChat – Real-Time Chat Platform (Node.js, Express.js, MongoDB, React, JWT)

- Built entire backend from scratch using Node.js and Express.js.
- Designed and implemented 12–15 REST API endpoints (Authentication, Chat Rooms, Messages, Profiles).
- Architected MongoDB schemas using referencing pattern to prevent massive array anti-pattern.
- Implemented secure authentication using bcrypt and JWT (Access & Refresh Tokens stored in httpOnly cookies).
- Developed custom authentication middleware to protect routes and validate tokens.
- Integrated APIs with React frontend and optimized rendering of 1000+ messages.

BetterMind – AI Resume Analyzer (Node.js, React, TypeScript, MongoDB)

- Designed backend API for resume processing and user authentication.
- Implemented modular backend logic for scalable data processing.
- Improved Lighthouse performance score from 65 to 92.
- Reduced Largest Contentful Paint (LCP) by 1.2s via optimization techniques.

ACHIEVEMENTS

Team Lead – Smart India Hackathon 2024 (Software Edition) Finalist

- Led a 5-member team building a real-time multilingual voice translation system.
- Coordinated backend API architecture and frontend integration under a 36-hour timeline.

Additional Highlights

- Built 15+ full-stack applications demonstrating scalable architecture.
- Maintained 39 public GitHub repositories.

EDUCATION

B.Tech – Computer Science (AI/ML)

Dr. APJ Abdul Kalam Technical University

(2022–2026)

HOBBIES & INTERESTS

Chess (strategic thinking), Sudoku (logical reasoning), Reading technology blogs, Exploring backend architectures
